

The NEW "Clean Shot" is designed to give you optimum wrist protection and support while playing your game and release.

This custom foam backing offers several configurations, all in one support. The foam is reversible to either make the "Clean Shot" a short or long version simply by sliding the foam off the neoprene sleeve and turning it around.

This custom foam backing is two sizes - 1/8" and 3/16" - and comes with a plastic insert that will stiffen the "Clean Shot" for a full wrist support.

The "Clean Shot" can be used with the 1/8" foam only, for bowlers who want the least restriction while still maintaining superior wrist support and protection.

The 3/16" alone, provides a little more support, or combine the foam backing into 5/16" as recommended for the most support.
